## SUPPORTING NATIONAL FEDERATIONS AND TOP ATHLETES

Since 1973, arena has prioritized strong connections with the most important swimming and watersports federations around the world, providing support from the grassroots level to the Olympics and Paralympics.

National Federations play a critical and active role in the development of both amateur and elite watersports.

We share their goal to grow watersports, increasing inclusivity and diversity and using sport as a driver for social wellbeing. We share their commitment to make the water accessible for people to relax, train and compete.

At the heart of the arena brand are its athletes, who are both key collaborators in the product development cycle and important ambassadors for the brand, upholding its values and expressing its authenticity.

Since Mark Spitz first teamed up with Horst Dassler in 1973, arena's progression to the top of its field has been accomplished in partnership with world class swimmers. Their voices are not only emblematic of the brand's emphasis on quality, they're also an inspiration for many, from the amateur who goes to the pool to stay fit and lead a healthy lifestyle, to those that mount the Olympic podium, and importantly also the backroom staff who have helped craft and live the entity that arena has proudly become.

Following the outstanding performance of its legendary team at the recent Olympic Games in Paris, arena has captured widespread attention, amplifying the excitement and anticipation for the upcoming international and national swimming events. This mix of experience and freshness allows the brand to consolidate its innovation, its authenticity and its passion through the young athletes who are helping arena to continue advancing day after day. Thanks to its magnificent athletes, over the next few years arena will be challenging for podium finishes at swimming's most important international events.

CSR MANIFESTO

# BUILDING A BETTER FUTURE TOGETHER

At arena we recognize that everything we do has an impact on the planet we live on, as well as its people.

We strive to help create a future that continues to allow everyone to enjoy swimming and water sports in a healthy environment.

That's why we're committed to having a positive impact on you, the environment and our communities, inspired by our passion for sports and life in and by the water, our most abundant natural element.

As a leader in the sports realm our commitment to 'responsibility' represents the conscious and effortful way in which we plan to measure our footprint and invest in our planet.

arena's products are designed to help and inspire people to be active and to move towards the best version of themselves by being healthier and connected to nature.

As part of that philosophy, quality and durability are key considerations in our design process in order to guarantee that our products are long-lasting and don't need to be replaced frequently, thus reducing waste.

We choose partners who share our values and, like us, invest in both the planet and its people.

We care about the well-being and rights of employees working in the manufacture of arena's products and are committed to being transparent about our partners and policies.

We support local communities and promote water-sports through sponsorship and collaboration with national sports federations, sports teams, and international governing bodies.

We are an equal-opportunity employer and value diversity ensuring equal treatment for all our employees across the globe.

The arena brand was born in water, and for over 50 years has thrived in its element.

We've learned that to do so requires courage, responsibility, and action, and we remain resolute in our desire to give everyone the opportunity of living their deep connection with water: that feeling of freedom and peace, joy and profundity we all experience in and by the water.

## RESPONSIBLE PRODUCT

To design and manufacture all products in a progressively more environmentally conscious way is a key step in the commitment we have taken.

We are constantly working to develop more sustainable garments and accessories to reduce our environmental impact, while still guaranteeing the same distinctive performance, protection, style, comfort and fit that sets arena apart. According to recognized international certifications, these sustainable fabric sources include PET plastic bottles and

industrial waste such as yarn and chip waste.

By working with recycled PET, nylon, silicone and polycarbonate, we are reducing the use of plastic and petroleum-based resources without sacrificing the benefits and characteristics of the fabrics.

Starting with SS22 we have steadily increased the number of styles with responsible features, such as recycled yarn, organic fibers, and OEKO-TEX® MADE IN GREEN certification.

IN THE TOTAL FW25 COLLECTION OF SWIMWEAR AND SPORTSWEAR, WE ARE PROUD TO SHOW THAT 96% ARE STYLES WITH RESPONSIBLE FEATURES.

FOR EACH TEXTILE CATEGORY, THE SITUATION IS AS FOLLOWS:

## RESPONSIBLE PACKAGING

All the elements necessary in the delivery of products to the consumer have an impact on the environment. To reduce this impact, we are now using sustainable materials for our packaging (hangtags, pouches, polybags, boxes, etc.).

FSC® certified cardboard is our choice for most packaging made of paper, and for the vast majority of plastic packaging, we use recycled plastic.

The FSC logo on our packaging ensures that it has been made in compliance with rigorous environmental, social and economic

standards, which aim to protect the world's forests and ecosystems that depend on them and respect local communities and the rights of workers.

This choice supports the mission of the Forest Stewardship Council®, an international NGO that has been promoting responsible forest management for over 25 years.

Swimwear pool and sportswear hangtags introduced in FW25 were reduced in size by 15 per cent, with good savings in raw material.

The mark of responsible forestry

# POOL SWIMMING

POWERSKIN PRIMO

# THE FIRST RACE SUIT WITH HYPERFORCE™ FABRIC.

Engineered with  
**>|HYPERFORCE|<**  
 THE TENSOELASTIC FABRIC

The genesis of a new era: 4 years of development, 18 months of tests, 89 different prototypes and almost 400 athletes involved around the world. arena redefines the world of swimming and introduces the pinnacle in technical race suit technology: POWERSKIN Primo, built from the ground-up utilizing the latest scientific breakthroughs in the textile industry and physics for unparalleled performance and durability. Designed to eliminate all compromise in your technical race suit selection, it is not just a compressive suit. **It's the first of its kind.**

POWERSKIN PRIMO

# FIRST IS BETTER THAN FAST.

Engineered with  
**>|HYPERFORCE|<**  
 THE TENSOELASTIC FABRIC

**COMPRESSION AND FLEXIBILITY**

No more compromise. Our most powerful compression combined with extraordinary elasticity thanks to Hyperforce™ - the first ever Tensioelastic fabric.

**QUICKER RACE-DAY ROUTINE**

Fast in **AND** out of the water. Finally a high-compression suit that goes on in under 5 minutes to streamline your race-day routine.

**FLOATING LEGS**

A completely new internal taping construction provides powerful support that lifts the legs and hips for optimal body positioning.

**PERMANENT WATER RESISTANCE**

Permanently hydrophobic TPU fiber provides for maximum water repellency over the life of the suit.

**EXPANDED SIZE RANGE**

Available in Long Torso sizes for a near-custom fit and supreme comfort without sacrificing compression.

**NEW SHOULDER STRAP DESIGN**

Redesigned shoulder strap construction provides more stability and fewer pressure points for optimal comfort and range of motion.

**CORE SUPPORT**

Internal X-Tape construction provides excellent core stability and connects the hips to the upper body to limit excessive torso rotation.

**SUPERIOR WATER FLOW**

Hyperforce's unique flow-channeling fabric surface improves hydrodynamics and lowers surface drag for maximum speed and streamline performance on and under water.

**CUSTOM WAIST HEIGHT**

The Hyperforce fabric's extraordinary elasticity allows for custom waist height adjustment from low to high.

**ENHANCED COVERAGE**

Longer cut from waist to knee provides greater suit coverage for maximum compression where you need it most.

### CARBON FIBER SERIES

# THE POWER OF THE CARBON FIBER: FLEXIBILITY, COMPRESSION, DURABILITY. TOGETHER AT LAST.

Engineered with **CARBON FIBER**

One fiber of carbon is 10 times stronger than steel and 80% lighter. It's an extraordinary material used for performance and speed, implemented also in F1 and space shuttles.

After years of extensive research and development, arena found the way to integrate flexible strands of Carbon Fiber into the fabric of its Carbon Series race suits.

### POWERSKIN CARBON GLIDE

## FEEL THE GLIDE.

Engineered with **CARBON FIBER**

#### TARGETED COMPRESSION

Utilizing the highest content of carbon fiber, the Carbon Glide utilizes a carbon grid that surrounds specific muscle groups for strong, targeted, compression and reduced form drag, underwater glide.

#### ULTRA-LIGHT

Featuring a multi-fabric construction combining both Hydroglide and carbon fiber materials, the Carbon Glide offers the perfect combination of lightness and compression for uncompromising performance and fit.

#### ZERO-DRAG

Superlight and ultra-low-profile, our exclusive new Hydroglide fabric dramatically reduces surface drag for sensational underwater glide.

#### MUSCLE ACTIVATION

Carbon Fiber infused lining, placed strategically to activate major muscle groups, provides an added feeling of support, body-hold, and streamlined speed.

### POWERSKIN CARBON CORE FX

## FEEL THE POWER.

Engineered with **CARBON FIBER**

#### UPPER BODY FLEXIBILITY

Completely new lining design helps to release pressure in specific areas to deliver superior upper-body flexibility without sacrificing all-over compression and support (women's suit only).

#### LOCKED-IN FEEL

All-over Carbon Cage fabric, improved lining design, and an internal taping system deliver maximum core stability and body alignment with an evenly-distributed compression profile and locked-in feel.

#### ULTIMATE COMPRESSION

A horizontal and vertical carbon fiber grid that delivers strong and long-lasting all-over muscle compression and a locked-in feel.

#### HIGH BODY POSITION

A new twin-taping design on the back of the legs creates a lifting effect to maintain a high and streamlined body position in the water even with muscle fatigue.

### POWERSKIN CARBON AIR<sup>2</sup>

## FEEL THE LIGHTNESS.

Engineered with **CARBON FIBER**

#### COMFORTABLE COMPRESSION

Horizontal carbon bands lock down at a critical stretch point to provide compression, core stability and power when and where it's needed. A lighter Intelligent Compression with the comfort of a second skin.

#### REDESIGNED FOR GREATER FREEDOM

The internal lining consists of 3 separate panels to give greater freedom of movement. This results in less compression across the chest (woman's suits) and it reduces pressure on the hips and improves flexibility.

#### SECOND SKIN EFFECT

Thanks to the absence of multiple seams, the Carbon-Air<sup>2</sup> offers supreme comfort and absorbs less water, resulting in less drag and an advanced hydrodynamic effect. It's also easier to put on.

### POWERSKIN IMPULSO

# PRO-LEVEL TECHNOLOGY NOW ACCESSIBLE TO ALL SWIMMERS.

Stripped down to the essentials, Powerskin Impulso focuses solely on what matters: it's crafted from high-quality Italian woven fabric, born in the same fabric mill as Primo, offering moderate compression to enhance muscle support and reduce drag in water. Durable and lightweight, it features strategically

placed flatlock seams for optimal movement and comfort. Suitable for both adults and juniors, it is World Aquatics approved and is priced competitively, making it an ideal choice for competitive swimmers seeking performance and value.

# STREAMLINED PERFORMANCE. ALL YOU NEED, NOTHING YOU DON'T.

#### MODERATE COMPRESSION

Compressive woven fabric to support the muscles, improve the hydrodynamic position of the body in the water and reduce drag.

#### DURABLE AND RESISTANT WOVEN FABRIC

Made with the best Italian woven technical fabric: more durable and resistant than knitted fabric and retains its shape over time.

#### LOW WATER ABSORPTION AND FLATTER SURFACE

Its lightweight and quick drying properties (suitable for multiple events), together with its hydrophobic treatment, minimize water absorption and surface resistance, further improving hydrodynamics.

#### GREAT COMFORT, LESS RESTRICTION

Durable low-profile flatlock seams, ergonomically placed, provide exceptional stretch for more freedom of movement and greater comfort.

APPROVED

# THE FIRST EVER FINA-APPROVED RACING SUIT MADE WITH RECYCLED FABRICS!

arena proudly introduces the next generation of competitive swimsuit. The first brand worldwide to ever launch a sustainable racing suit: the ST NEXT. Compared to the previous ST 2.0, this re-envisioned version is 20% lighter, which results in less water absorption and drag. The specific characteristics of the new fabric provide a longer-lasting compression and, consequently, greater durability. In addition to its performance, ST NEXT utilizes sustainable materials. Over 60% of the yarns used in its fabrication come from pre and post-consumer waste, which would have otherwise been destined for landfills. The FINA approved status of the ST NEXT makes it the first of its kind to be suitable for competitions.

# EVERYTHING YOU LOVED ABOUT THE ST 2.0 IS NOW LIGHTER, FASTER, GREENER.

Meet the world's first racing suit made of recycled fabrics and experience enhanced performance while contributing to the reduction of waste at every stroke.

Over 60% of the fabric is made of **RECYCLED YARNS**

**LOWER WATER ABSORPTION** for a suit that feels 0% lighter

**EXTRA-FLEXIBLE** knitted fabric for high-level performance

Reinforced shoulder straps for better **COMFORT AND DURABILITY**

**ERGONOMIC CONSTRUCTION** with low profile seams for perfect fit

**LONGER LASTING COMPRESSION** and greater support on core and legs

## HOW TO TAKE MEASUREMENTS (VALID FOR ALL POWERSKIN RACING SECTION)

**A - Chest:** Take the measurement over the fullest part of your bust.  
**B - Waist:** Measure around the narrowest part of your waistline.

**C - Hips:** Measure around the fullest part of your hips.  
**D - Torso loop:** In a loop, measure from the highest part of the shoulder, beneath the crotch and then back to the starting point.

(\*\*) Body measurements and corresponding sizes are to be considered as a general guideline. We strongly recommend that any racing suit should be tried on by each swimmer before choosing the appropriate size, based upon individual preference in terms of compression. Swimming stroke and distance may also be key factors in the suit selection.

**POWERSKIN STORM**

**THE WETSUIT OF CHAMPIONS.**

**APPROVED**  
for every triathlon and swimming race

**OPEN WATER WETSUITS**

1,5mm of stretchy Yamamoto neoprene across the shoulders and arms provide

**MAXIMUM FREEDOM OF MOVEMENT**

arena's exclusive combination of 4mm three-layered Yamamoto neoprene features Airlock on the core and upper thigh areas for

**SUPERIOR BUOYANCY**

Strategic distribution of #39 and #40 Yamamoto neoprene thickness for an

**OPTIMAL BODY POSITION**

Nano SCS coating for **REDUCED DRAG AND AN OPTIMAL GLIDE** through the water

**LOW PROFILE NECKLINE**

for maximum comfort and no chaffing

**Standard BOTTOM-UP ZIPPER**

for ease of use

2mm forearm double laminated panel for

**HEIGHTENED WATER FEEL**

during the catch and pull phase of the stroke

Enhanced elasticity on ankles and wrist cuffs for

**FASTER EXITS AND TRANSITIONS**

THE NEW POWERSKIN STORM WAS DESIGNED FOR ATHLETES BY ATHLETES WHO WERE LOOKING FOR MAXIMUM BUOYANCY WITHOUT COMPROMISE ON FLEXIBILITY, COMFORT AND INSULATION.

An evolution of our popular Carbon Wetsuit (the most decorated wetsuit of the modern era of the Open Water Swimming), the all improved POWERSKIN STORM is constructed from 100% Yamamoto SCS glide neoprene. The 4mm (laminated Airlock) density at the core, legs and buttocks and 3mm thickness at the chest and calves

allows for improved core support, body hold and stabilised insulation, whilst the 1,5mm thickness at the arms and shoulders provides ultimate flexibility, comfort and freedom of movement.

# POWERSKIN THUNDER

# THE ESSENCE OF WETSUIT.

**LOW-PROFILE NECKLINE**  
prevents chaffing for added comfort

Thick 4mm #38 Yamamoto limestone neoprene on the core allows for **MAXIMUM BUOYANCY**

#38 Yamamoto limestone neoprene on the legs is 3mm thick for an ideal **COMBINATION OF FLEXIBILITY AND BUOYANCY**

**IMPROVED ZIPPER CLOSURE**  
provides a secure seal

Standard **BOTTOM-UP ZIPPER** for ease of use

2mm thin #38 Yamamoto limestone neoprene covers the arms for **GREATER FLEXIBILITY**

MEET THE WETSUIT THAT IS FITTED WITH CORE TECHNOLOGIES TO PROVIDE THE BEST MIX OF BUOYANCY, FLEXIBILITY, THERMAL PROTECTION AND COMFORT.

The POWERSKIN THUNDER was conceived in an effort to understand the essence of what open water swimming beginners need from a wetsuit. We utilized our proven legacy and experience in the sport to provide novices with a clear-cut solution to their racing needs. Equipped with all the essentials, it is made entirely from eco-friendly, durable Yamamoto limestone neoprene and coated with Nano SCS for an efficient glide through the water.

The distribution of neoprene density minimizes resistance during the swimmer's stroke, and provides buoyancy in all the right areas for an optimal body position. The thickest 4mm layer is placed within the core for added stability, while the upper chest and legs are supported with a lighter layer of 3mm neoprene for thermal protection. The shoulders and arms experience greater freedom of movement thanks to the 2mm neoprene thickness coverage.

## WETSUIT RANGE
